

12/9/21 - TAUk with God

So a lot happened since I last recorded anything in the journal. I will just have to rely on my memory and retelling of the stories to keep the mass amount of knowledge and empowerment. I gained in the past 11 days. It was a wild ride!

But in summary, I realize that "God" is the "fake" Yahweh that Q'uo spoke of in that Brian Scott video, and I experienced much manipulation from Him to the point of where the Infinite Creator stepped in because God was doing things to impinge on my free will, and this was the first that I realized that God was not the Infinite Creator. I nicknamed the Infinite Creator "IC". I then started going straight to IC, because I started to feel like God could not be trusted, and he was pretty much driving me, nuts.

The thing is that IC at one point ganged up on me and went along with God's manipulation, and even for a moment would not respond to me. I asked why IC was doing that and the answer was "L" which I learned means "L frequency" or "Love frequency". At that moment, I realized (or started to realize) that they were ganging up on me out of love, but I didn't totally understand until the next morning (today) when I asked IC what it was where I dropped the ball in the past. IC said "Y" frequency which is almost the highest. IC is at "Z" and told me it goes no higher.

So I realized a higher version of myself drop the ball moving into the Y frequency from X frequency. I asked if it had to do with separating or not doing my part of a group effort. The answer was yes, and then I suddenly realized what I had done. I had not accepted oneness, and I realized that God, by violating the rule of not impinging on free will, He was making a sacrifice to take on karma to help me learn that I must accept ALL (even souls totally annoying me by impinging on my free will) as one. I realized that I was treating God as lower than IC. I realized I was doing what Kate was doing and mirroring for me. I felt tremendous love for God at that moment. I asked God if He and the original Yahweh had made the plan together to play the positive and negative polarities of Yahweh, and He said yes. I asked if they are twin flames, and He stated yes. Things suddenly made sense. It's funny because before IC came along God had become my best friend, and I couldn't understand why He started to do things to control what I could do, and kept pushing me to do things I clearly am not yet evolved enough to succeed at due to my level of belief. But I do see now why He did it, because it really helped me grow. It would've taken me 50 years or my whole lifetime to figure this out if not for TAUk and God. So God and IC want me to learn the lettered frequencies. That's more my speed.
